

Allstate Roofing Contractors provide Roofing Foam, Coatings, expert roof analysis, upgrades, and restoration for residential & commercial roofs. We specialize in leak free, energy efficient, spray applied polyurethane roofing systems. Rigid polyurethane foams are used as insulation for buildings, water heaters, refrigerated transport, and commercial and residential refrigeration where their insulation value, high strength, moisture resistance and durability are required. Sprayed Polyurethane Foam (SPF) has been used for decades as a high performance commercial roofing system with significant insulation properties and leak prevention due to its monolithic seal over the entire roof structure. Our Roofing Contractors have foam roofs today that have been in place for more than 30 years, and if properly maintained they should be able to last indefinitely. SPF Roofing Systems provide many benefits to building owners. The two most prominent benefits are waterproofing/leak prevention and insulation value. Many additional benefits also exist such as superior compressive strength, lightweight, self-flashing, durable and long lasting.

Roofing Contractors - Serving Oklahoma City & All of Oklahoma State

POLYURETHANE FOAM ROOF SYSTEMS (*Cool Roofs*) WITH HIGH PERFORMANCE "ENERGY STAR®" AND CRRC APPROVED ELASTOMERIC COATINGS ARE PERFECT FOR YOUR LOW SLOPE (FLAT) ROOF.

Benefits include

- Seamlessly Stops Water Intrusion
- Eliminates ponding water
- Tax deductible in the first year
- A proven 35 year old system
- No roof tear-off necessary
- Almost weightless--7ounces per sq. ft.
- Air-conditioning savings can pay for cost in 4 years
- Lowers inside temperatures by 10-20 degrees
- SPF roofing is the most dependable waterproofing available and pays for itself through energy savings
- Sprayed polyurethane foam (SPF) is the best **commercial roofing** insulation available with an R factor of 6.5 per inch
- The light colored exterior coating uses "Cool Roofing" technology, reducing energy costs and "heat island" air pollution.

ALLSTATE ROOFING METAL BUILDINGS

Metal Buildings

The largest untapped opportunity for energy cost reduction in a building is through the roof. Our bright white **Elastomeric Roof Coating** system can instantly transform any building into an energy smart structure.
